PROFESSIONAL SUMMARY

Berlin-based Senior Product Designer with 10+ years of experience transforming complex technical requirements into intuitive user experiences for B2B SaaS. Leveraging a background in Front-End Engineering to bridge the gap between design and development, ensuring technical feasibility and rapid iteration. Deep domain expertise across Hospitality (POS), Healthcare, and EduTech sectors.

Hands-on strategic leader with 4+ years of experience directing design teams and architecting complex, scalable design systems. Currently architecting Clinical Intelligence systems that enhance medical workforce readiness, alongside scaling an AI-powered high-velocity POS ecosystem for the global hospitality market.

Core Competency: B2B SaaS, Design Systems (Scaling & Maintenance), Concept Building using AI Tools, Rapid Prototyping, User Research & Testing, Stakeholder Management.

Tools: Figma (MCP Server, Variables, Advanced Nested Components & Auto-layout), Framer, Dev Mode Handoff, AI-Driven Design Tools (Claude/Gemini/Lovable).

Additional Competencies: Project Management, Team Leadership, Cross-Functional Collaboration, Client Communication

Language: German A1 (Learning), English (Fluent/C1), Nepali (Native)

EDUCATIONAL BACKGROUND

Executive Master's in Business Administration 2022 - 2024

Kathmandu University School of Management, Balkumari

Bachelor's in Computer Engineering 2010 - 2014

Kathmandu University, Dhulikhel

H.S.E.B. +2 2008 - 2010

The New Summit College, Old Baneshwor

S.L.C. 2008

The New Summit Higher Secondary School, Maitidevi

PROFESSIONAL EXPERIENCE

Senior Product Designer at Altitude Jun 2025 - Present

Altitude Inc, Remote (Headquartered in New York, USA)

Currently working part-time design contractor for a USA Healthcare company where I design:

- **Clinical Intelligence Platform:** Designed the "Altitude Operating System(AOS)" dashboard, enabling Medical Directors to track clinician competency across specific medical domains and monitor workforce readiness at scale.
- **AI-Assisted Workflow (MVAs):** Architected the UX for "MVAs" (Context-Aware Clinical Actions), a feature that analyzes patient charts to generate real-time, actionable recommendations for clinicians directly within their workflow.
- **Design System Architecture (MCP-Ready):** Building a scalable design system from the ground up, utilizing MCP-ready component structures. By establishing a semantic, token-based framework, I ensure that AI agents can

accurately interpret and utilize UI elements, bridging the gap between raw data patterns and production-ready designs.

- **Strategic Vision:** Transformed the product vision of "a colleague in the workflow" into intuitive interfaces that bridge the gap between organizational training goals and daily patient care.

Senior UI/UX Designer at Resimator Oy

Mar 2025 - Jan 2026

Resimator Oy, Remote (Headquartered in Turku, Finland)

Currently designing cross-platform AI-powered tools and enterprise interfaces, leading the design direction for two core products:

- **WrkPrt (aka. WorkPort AI Agent):** Designing the interface for an internal AI booking assistant, focusing on conversational UI and streamlined service procurement.
- **Numu POS:** Leading the user experience for a restaurant point-of-sale system, focusing on touch-friendly navigation and rapid order workflows for high-volume environments.
- **Collaborating with developers and product stakeholders** across time zones to ensure smooth handoffs and shared understanding of design goals.
- **Establishing clean, scalable design systems** for each product to ensure UI consistency and development efficiency.
- **Conducting user research and usability reviews** to guide design iterations and validate improvements.

Co-Founder and Design Lead of Black Dove Studios

Jan 2022 - Mar 2025

Black Dove Studios, Kalikasthan

I co-founded a design agency based in Kathmandu. Following were my responsibilities:

- **Growing the agency,** overseeing business development, client acquisition, and overall strategic direction.
- **Manage and mentor a team of designers,** fostering a collaborative and creative work environment.
- **Collaborate with clients and stakeholders,** translating business goals into compelling design solutions.

- **Oversee the creation of UI/UX designs**, ensuring alignment with client brand guidelines and user needs.
- **Leverage industry trends and emerging technologies**, incorporating innovative solutions into projects to meet client objectives.
- **Present design concepts and strategies to clients**, effectively communicating the value and rationale behind design choices.

**Lead Product Designer and Design Team Lead at
mySecondTeacher**

Mar 2019 - Feb 2024

Innovate Tech, Baluwatar

Since the inception of the mySecondTeacher Platform, I have been a key member of the core product team. My notable achievements include:

- **Led the design** of the main web platform and led to build its design system, creating a cohesive and user-friendly experience.
- **Conducted research, competitive analysis and data analysis**, informing design decisions and contributing to the design of the business intelligence (BI) components of the platform, thereby enhancing data accessibility and decision-making.
- **Supervised the design** of the Mobile App (iOS and Android), TV App, and supporting back-office application.
- **Managed the design and development** of company websites and various product-specific sites.
- **Oversaw video content production**, establishing animation styles and guidelines prior to the setup of the animation department.
- **Contributed to storyboarding and visualization**, enhancing script clarity and visual storytelling.
- **Defined processes and documentation**, improving collaboration among cross-functional teams throughout the company.

Senior UI/UX Designer & Front-End Developer

Aug 2015 - Mar 2019

Expresiv Studios, Charkhal

Grew the most in my career during this period. Worn multiple hats and eventually fully transitioned from developer to designer during this time.

- As a Front-End Engineer developed multiple websites such as Medilink, Foodmandu, SynapsePay, etc and optimized their loading times.
- As Senior Designer, help designed multiple websites and webapps, most notables are Foodmandu, HoneyGuide, Upaya City Cargo, KomodoHealth, etc

Jr. Software Developer

May 2014 - June 2015

Young Innovations Pvt. Ltd., Kumaripati

I started my career in this company where I worked as developer in projects with data visualization such as Development Check, D-portal, and Model-4G for Ward 7 - Kathmandu.
